

ACCU-LEVEL™

AC TANK LEVEL INDICATOR

STOP OVERFILLING TANKS!

Determining the amount left in your A.C. Tank with an antiquated and problematic lever and pulley system is a thing of the past with Hotmix Parts' new Accu-Level for A.C. Tanks. This innovative piece of equipment makes it so that you never second-guess how much material is currently in your A.C. Tank farms ever again.

Through the use of new cutting-edge technology, the Accu-Level is able to detect the accurate amount of liquid A.C. in your tank without distortion from the internal agitator. This device allows for incredibly accurate readings even in situations of heavy build-up and volatile gases associated with asphalt storage.

Anything for an Asphalt Plant.

The Accu-Level can be incorporated into your current PLC or be a stand-alone control. With our remote monitoring system, you can keep track of tank levels from any computer, phone or tablet that share the same network as the device.

Measures within **1½% accuracy** using a precise digital read-out.

Call us today to learn how the Accu-Level™ can be the newest addition to your process.

ACCU-LEVEL™

SILO LEVEL INDICATOR

STOP OVERFILLING SILOS!

Determining the material amount in your silos using antiquated mechanical bindicators and paddles is a thing of the past with Hotmix Parts' new Accu-Level for Silos. This innovative piece of equipment makes it so that you never second-guess how much material is currently in your silos ever again.

Through the use of new cutting-edge technology, the Accu-Level is able to detect the accurate amount of hot mix in your silo within 1½% Actual Volume Accuracy. The Accu-Level even adjusts for the slope of the silo cone.

Anything for an Asphalt Plant.

Confidence to:

- Get more mix in your silo
- Tell your paving foreman exactly how much mix is left
- Know whether to keep the plant running or shut it down

Measures within 1½% accuracy using a precise digital read-out.
