

Featuring Expanded Liquid A.C. Circuit Monitoring

The New Day & NiteOwl is another advantage and leap-forward for the hotmix asphalt industry.

The unit monitors the same points as the NiteOwl, but also allows the plant operator and personnel to check and monitor other items on the plant. Items like the level in the A.C. tanks to eliminate tank overfills or alert if the A.C. level is low. It also monitors for amps on motors in case the unload pump used by delivery drivers goes awry. Other expanded features include:

- The capability to call and/or text via cellular network when an alarm is triggered.
- Monitoring the main power connection. In case of failure, the system can still be fully operational for several hours and trigger an alarm alerting the power failure situation.
- Registered users can inquire about the status at any time via call or text.
- Monitor, record and modify operations from the database records that are remotely accessible.

Over 2,800 years of accumulated experience.

- Engineering services
- Plant service provider
- Electronic technicians
- Customer service representatives
- Custom fabrication
- Over 70,000 parts in stock
- Emergency shipping (located next to UPS world hub)
- Used equipment inventory
- Proven electronic plant controls
- 24/7 emergency service
- Combustion/air system analysis
- Obsolete parts solutions
- Plant diagnosis and correction
- Series of safety innovations
- Reconditioned used equipment
- Cost-saving solutions

- **No more cold morning asphalt**
- **Reduce weekend plant visits**
- **It calls/texts you**
- **You can check status anytime**
- **Save thousands in downtime costs**
